Hose

AIRHOSE

Valuflex

Valuflex is designed to handle many special purpose air and water applications. This quality, versatile hose meets the requirements for the industrial, construction and agricultural markets where oil is considered a significant factor.

Valuflex has an EPDM lube and cover that resist abrasion, heat and ozone. It is reinforced with multi-spiral layers of durable polyester yarn that keep it flexible and easy to handle. Constant working pressures of 150, 200 and 300 psi make Valuflex one of the finest general purpose hoses on the market.

Red Valuflex®

Sizes: 1/4" through 1 1/2" I.D.
Working Pressure: 150#, 200#, 250# and 300#
Branding: White Ink: Size-WP-Made in USA
Oil Resistance: Limited
Construction:
Tube: EPDM
Reinforcement: 2 and 4 spiral polyester yarn
Cover: EPDM

Impact Tool Air

Impact Tool Air hose is designed for tough service station and shop applications. It features an EPDM tube and cover with a four spiral polyester reinforcement that provides superior durability and excellent flexibility.

Sizes: 3/8" through 1 1/2" I.D.
Working Pressure: 300#
Branding: Thermoid Size Impact Tool Air Hose made in USA
Cover Color: Red
Oil Resistance: Limited
Construction:
Tube: EPDM
Reinforcement: 4 spiral polyester yarn
Cover: EPDM

3/4" Jackhammer Hose

Jackhammer Hose assemblies are available in coupled lengths, double banded, individually boxed, with universal air couplings in 50 foot sections. Other lengths and crimped on fittings are also available upon request.

Construction:

- Tube: Smooth, seamless EPDM/NR black rubber.
- Reinforcements: braided polyester.
- Cover: Smooth, seamless EPDM/SBR cover is abrasion and ozone resistant. The standard color is red. Also available in yellow, blue, green or grey.

Temperature: -28°F to 176°F

Specifications:

I.D. (in)	Working O.D. (in)	Burst Pressure (PSI)	Pressure (PSI)	Lbs. Per Foot
3/4	1.141	300	1200	.44

Powertrack

RETRACTABLE DUCTING

SEWN HOSE

Specifications

Temperature Range: -20 F to 200 F
Standard Color: Yellow or White (other colors available)
Standard lengths: 10', 15', 20', 25'
Sizes: 8" to 36"
Pitch: Standard pitch is 4" (wider pitch available up to 7")
End finishes: Plain are standard. Wire rope couplers or soft cuffs with belt and belt loops are optional.
Flame retardant: UL-94VO-FS-590
Support grommets are available.
Other materials are available for higher temperature applications up to 700 F.

Description: ED-W is a single ply, 10 oz. vinyl coated polyester fabric duct with a heavy duty PVC wearstrip and enclosed wire helix. The stitched construction makes the ED-W a strong, durable, lightweight ducting product. The ED-W is portable, compressible, and retracts up to 1/8th of the original length.

The fabric that ED-W is manufactured from has the following features and benefits:

- Tear Resistance
- UV, Moisture & Weather Resistance
- Flame Retardant
- Hi-Tensile Strength
- Lighter & Heavier Fabrics Available

Applications: For use in portable and permanent installations:

- Positive Air Ventilation
- Utility Blower Hose
- A/C Rental Industries

WATERHOSE

Contractor's Water Hose

Powertrack International's Contractor's Water Hose assemblies are available with brass ferrules and heavy duty Garden Hose (GHT) fittings in coupled lengths of 50, 75 and 100 foot sections. Other lengths and fittings are also available upon request.

Construction:

- Tube: Smooth, seamless black synthetic blended rubber.
- Reinforcements: High strength polyester yarn.
- Cover: Smooth, seamless black/red synthetic blended rubber.

Temperature: -40°F to 176°F

Specifications:

Hose/Accessories

Hose

P.V.C. Blue Water Discharge Hose

Discharge hoses are available as ready-to-use complete assemblies. Coupled assembly price includes male & female pipe thread short shank couplings banded with Band-It clamps.

Applications: The right choice for lower pressure discharge, dewatering, mines, construction, general cleanup, marine and irrigation applications.

Construction: This layflat hose is made with specially compounded high quality PVC and synthetic high tensile yards. Good resistance to abrasion, water absorption and freezing temperatures.

Temperature: -5°F to 130°F

Color: Blue cover.

STEAMHOSE

Boston Concord 250 Steam Hose

1/2" assemblies available with one wire braid, construction provides 250# working pressure and 2-bolt clamps. Assembly is complete with 1/2" male pipe thread ends.

Applications:

- Transfer of steam for processing products and cleaning equipment
- Transfer of steam or hot 200°F detergent-type solutions for cleaning of equipment, tanks, buildings, etc.
- Resists heat, aging, ozone and weather
- Meets RMA standards; 10-to-1 safety factor

Cover: Red pin pricked EPDM

Reinforcement: Wire, 2 braid

Tube: EPDM

Temp. Range: +450°F

PRESSURE WASHER

Cold and Hot Water

3000# and 4000# (working pressure) Pressure washer assemblies available. Each assembly features swivel male pipe thread ends and a bend restrictor to help protect the hose behind the fitting.

Applications:

Good for heavy duty use with hot and cold water (up to 212°F), detergent fluids and high pressure cleaning equipment. Extremely flexible, light weight and easy to handle. Bend restrictors are suggested to extend the service life of this hose.

NOTE: Not for use on Stream Service equipment.

Construction:

A special synthetic black rubber tube is ideal to handle pressure washer service. The cover is oil-resistant. The one or two wire high tensile steel reinforcement is specially compounded to handle the pressure washer environment. Pressure Washer 212 Hose is oil, fuel, weather, ozone and abrasion resistant.

Temperature Range: -40°F to 212°F

Color: Black nonmarking synthetic rubber cover

Range of Working Pressure Available: 3,000 psi, 4,000 psi

Size: 3/8"

PAINT SPRAY HOSE

Assemblies provided with springguards on both ends for extra durability.

Construction: Nylon 6 tube. /**Cover:** Polyurethane

Reinforcement:

- PS1 Series - 1 wire braid, brass coated
- PS2 Series - 2 wire braid, brass coated
- PS3 Series - textile yarn

Temperature Range: -40°F to -212°F

Apps: Paints, lacquers, solvents, chemicals, hydraulic fluids and petroleum products.

Electrical Conductivity: Wire or treated textile reinforcement used to dissipate static buildup.

SANDBLAST HOSE

Powertrack®

Assemblies come with either crowfoot on each end or crowfoot one end and nozzle holder on other. Uncoupled bulk hose also available.

Standard Length: 50 or 100 Ft.

Construction: The cover is a black smooth abrasion and weather resistant synthetic rubber. Cover is pin pricked to prolong the life of the hose.

Tube: The static conducting of natural rubber offers an excellent abrasion resistance.

Applications: Designed to convey abrasive sand and shot blast material.

WELDING HOSE

Thermoid®

Tuline/Single Line Welding

Tuline and Single Line are designed for the steel, metalworking, ship-building and construction industries. The tube is smooth and free of contaminants, which is important when welding with argon or other sensitive gases. The abrasion resistant cover resists cracking and weather. Multi-spiral reinforced construction makes the hoses extremely flexible and easy to handle in cramped spaces. They are virtually kink-proof and crush-proof. Both hoses are available in R, RM or T grades, and exceed RMA/CGA requirements.

Sizes: 3/16", 1/4", 5/16" and 3/8" I.D.

Working Pressure: 200#

Branding: White per RMA requirements

Cover Colors: Single Line & Tuline types-Red for fuel gas. Green for oxygen. Other colors available.

Cover Oil Resistance:

BOSS COUPLINGS

“EZ-Boss” Ground Joint Seal

“EZ-Boss” non-metallic polymer seat (US Patent No.5,577,777) is not subject to corrosion and offers resistance to chemicals and steam found in manufacturing facilities. A precisely machined recess holds the seat firmly in place, allowing it to absorb harsh punishment. Recommended for steam service up to 450°F; easy to seal; works with existing “Boss” Ground Joint Stems. Use with “Boss” Clamps. Made in USA.

Note: 4 Gripping Fingers also available - please call for more information.

Note: The bolts used in the “Boss” interlocking clamps are not standard bolts. They vary from standard bolts in their length, diameter, overall thread length and material hardness. These bolts can be retorqued, but it is not recommended that they be reused, as they are designed for a single bend only. Dixon recommends using only factory supplied replacement bolts.

• The use of an “Air King” Safety Clip or wire type retainer is necessary to assure “Air King” Universal Couplings will not become accidentally disconnected. This guarantees the fittings are properly connected as pin will not go through holes in mating flanges until couplings are locked in place. Only one “Air King” Clip or wire type retainer is required for each “Air King” Universal Coupling.

- “Air King” is rated to 110 PSI.
- Standard “Air King” fittings come with AWR4 washers.
- “Air King” available to meet MIL Spec. WWC-633D - please call for more info.

Dixon

“Air King” Accessories

“Air King” is for Air Service Only

The use of an “Air King” Safety Clip or wire type retainer is necessary to assure “Air King” Universal Couplings will not become accidentally disconnected. This guarantees the fittings are properly connected as pin will not go through holes in mating flanges until couplings are locked in place. Only one “Air King” Safety Clip or wire type retainer is required for each “Air King” Universal Coupling.

Washers

Description	Part #	Pkg. Qty.
Rubber	AWR4	50
Neoprene	AWS6	50

- Same Size for all Coupling Sizes.
- Rubber temp. range: -20°F to 160°F.
- Neoprene temp. range: -20°F to 190°F.
- Neoprene is oil resistant.

In-Line Lubricators

Designed to protect portable or stationary air tools by efficiently oiling the tool mechanisms. Each time an air tool is operated, a fine mist of oil is injected into it along with the air from the compressor. Installation is recommended within 25 feet of the tool to be lubricated. Refer to the arrow for proper air flow direction. Transparent sight disc allows visual inspection of oil level. Oil flow regulated by screwdriver screw adjustment. Not recommended for constant flow applications. Minimum flow rate is 30 SCFM

NPT Size (in)	Oil Cap. (Oz.)	Max. Working Pressure (psig)	Air Flow at 70 PSI (scfm)	Part No.
1/2	1.4	500	30	PL300
3/4	3.7	200	70	PL400
3/4	11.0	300	70	PL400L
1	16.0	250	100	PL500

Type of Oil to Use: Use any petroleum-base, non-detergent light weight oil (SAE 10/150SSU) which will readily break up into a mist, i.e., MOBIL DTE light or comparable oil. Do not use any synthetic oil or oils containing additives or solvents.

“Whipchek” Safety Cable

Use “Whipchek” to help prevent accidents or injury resulting from hose or coupling failure.

These strong steel cables prevent hose whip in case of accidental separation of coupling or clamp device. “Whipchek” reaches across the hose fittings to provide standby safety for hose. Spring-loaded loops in the cable ends open easily to pass over the couplings for a firm grip on the hose. Thoroughly tested with years of service. “Whipchek” must be installed in the extended position (no slack). Maximum Working Pressure: 200 PSI for Air.

Features:

- Hose-to-hose or hose-to-rigid outlets.
- Whipchek is the low cost answer to eliminate injuries caused by broken air hose connections
- Highly resistant to rust and corrosion
- No tools needed - Easy to install & remove

Style WSR, for hose-to-tool service

"Air Chief" Automotive Quick-Connect Fittings

AUTOMOTIVE INTERCHANGE

"Air Chief" will interchange with the more popular makes of Automotive Quick-Connect fittings which are accepted as "standard" such as Amflo, Dill, Milton and Trufflate. There are some makes however, which do not interchange with any others. If you plan to interchange these couplings, make sure you have plug ends with the proper configuration. Rated 300 PSI. Temp range - 40° F to 250° F.

Semi-Automatic - Pull Sleeve to Connect

“Air Chief” Safety Blow Gun

Basic safety blow gun for general purpose use. Tip pressure will not exceed 30 PSI, yet gives a good blast of air for cleaning. Safety glasses or shield must be worn when using any blow gun.

- Large vinyl thumb grip provides additional user comfort.
- Can now be used for water.
- The area at the bottom of the blow gun is recessed to perfectly fit the user's fingers, allowing a firm, yet relaxed grip.

1/4" Female NPT Inlet
Part # D204-30

Note: The Dixon Air Chief Blow Gun has a safety tip which prevents buildup of tip pressure in the event the outlet is obstructed or “dead ended”. It complies with the requirements for OSHA 1910.242(B) and 1910.95 when used on air lines of 150 PSI or less.

Dixon

Brass Tip Blow Gun

Ventless tip provides the most economical means of achieving a concentrated air stream for many blow-off applications.

1/4" Female NPT Inlet
Part # D605

Caution: This blow gun does not have a safety by-pass to prevent buildup of tip pressure in the event of tip blockage. It may be used for cleaning purposes only if the air supply (inlet pressure) has been reduced to 30 PSI or less.

Rubber Tipped Blow Gun

Provides leakproof seal between gun & fluid line or other opening. Also excellent for cleaning molds or delicate surfaces where a metal tip might scratch or otherwise harm critical areas.

1/4" Female NPT Inlet
Part # D201

Caution: This blow gun does not have a safety by-pass to prevent buildup of tip pressure in the event of tip blockage. It may be used for cleaning purposes only if the air supply (inlet pressure) has been reduced to 30 PSI or less.

“Coil-Chief” Self-Storing Air Hose

Repair/Assembly kits include rigid or swivel male fittings, nut, insert, ferrule and spring guard.

Male NPT Size (in)	Hose I.D. x Lgth (in x ft)	Part No.

This clamp meets old Mil Spec WW-C-440B, which has been cancelled and the new governing spec for hose clamps is SAE J1508.

Max. Recommended Torque 30 in. lbs.

Miniature Worm Gear Clamps

Style MH

Miniature with combination 1/4" Hexagon and Screwdriver Slotted Screw. SAE 300 series stainless band and housing. SAE 1018 case-hardened steel, zinc plated and chromate dip screw. 5/16" band width.

Style MAH

Miniature all Stainless Construction with Combination 1/4" Hexagon and Screwdriver Slotted Screw. SAE 300 series stainless band and housing. SAE 305 stainless screw. 5/16" band width.

Dixon Worm Gear Clamps

Euro-Seal™ Embossed Worm Gear Clamps

- Internally embossed perforations eliminate hose damage of soft cover hoses and extrusion through band slots
- Rounded band edge protects hose surface
- Smooth housing underside ensures greater concentricity
- ES 300 series stainless steel band, saddle and housing with a carbon steel plated screw
- ESS 300 series stainless steel, band, saddle and housing with 316 stainless steel screw
- 7 mm slotted hex head screw
- Can be fastened with 9/32 socket

Band Clamp Tools and Accessories

Part #	Application
F1	Hand Held tool for application of 5/8" band clamps. Import tool.
F100	Hand held too for application of 3/8" and 5/8" band clamps.
F38	Locking Tool. Portable hand tool used to apply punch type 3/8" and 5/8" band clamps. For use with F series only.
F40	Hand Tool. Intermediate hand tool for 3/8" and 5/8" band clamps.
F175	Hand held tool for application of 3/4" K clamps.
F550	Clamp Cutter
F225	Mallet for punching band clamps.
51970	Adapter for 51960 for installing preformed clamps.
F229	3/8" clamp adapter for F100 tool only.

VALVES

Brass Ball Valves (Imported)

For control of air, water, oil and gas in hose pipe lines. For other services, please call. BV and FBV have forged brass bodies, Teflon seats, seals and thrust washers: Blow-out proof stems; Chrome-plated Brass balls and Plated Steel handles. Temperatures range to 320°F.

Rated to 400 PSI WOG and 125 PSI Steam.

Rated to 600 PSI WOG and 100 PSI Steam. U/L, FM, American Gas Association and Canadian Gas Association Approved.

Safety Check Valves

For portable Air Compressors

- Complies with OSHA requirements
- Functions efficiently at high discharge temperatures
- Full flow
- Protects against hose whip instantly and automatically
- Resists automatically after airline repressurizes

Construction: Solid brass body and valve with Stainless Steel spring and roll pin.

Max. Working Pressure: 250 PSI.

Max. Temperature: 250° F.

Purpose: Automatically senses change in air flow and shuts off the flow in the event of a surge in excess of valve rating, preventing dangerous “hose whip”. Fully conforms to *OSHA regulation 1926.302 requiring safety device at source of air supply and at branch air lines. Controls air flow in only one direction, however, permits flow in either direction. Possible applications include temporary Plant/Factory air, Construction sites, Shipyards or Utilities.

SELECT-A-SPRAY NOZZLES

Metal Body Select-A-Spray Nozzle* - 584

- 4-position dial for spray pattern selection
 - Full action
 - Gentle shower
 - Sharp stream
 - Flat spray
- All brass valve stem with permanent adjusting nut
- Hold-open clip for continuous spraying
- Rust resistant stainless steel spring
- Self-adjusting "duck" packing for lifetime leakproof seal
- Heavy-duty die cast zinc body

* Standard USz - ASH hose thread available with BSP converter for export.

INSULATED & COMFORT GRIP NOZZLES

Insulated Pistol Grip Nozzle - 572

- Ideal for commercial or industrial use
- Insulated molded grip for spraying hot or cold water
- Brass head insert for maximum resistance to extremely hot water
- Solid brass valve stem with permanent adjusting nut
- Hold-open clip for continuous spraying
- Rust resistant stainless steel spring
- Self-adjusting "duck" packing for lifetime leakproof seal
- Heavy-duty, full-size, die cast zinc body

Insulated Pistol Grip Nozzle with Threaded Front - 572TFR

- Ideal for commercial or industrial use
- Insulated molded grip for spraying hot or cold water
- Male hose threaded front for attaching accessories
- Rubber head guard to protect threads
- Brass head insert for maximum resistance to extremely hot water
- Solid brass valve stem with permanent adjusting nut
- Hold-open clip for continuous spraying
- Rust resistant stainless steel spring
- Self-adjusting "duck" packing for lifetime leakproof seal
- Heavy-duty, full-size, die cast zinc body

Water Sweeper Nozzle - 571FWS

- 571TFR insulated pistol grip nozzle with aluminum extension wand and polymer jet spray tip
- Provides a concentrated spray for tough cleaning applications
- Extension wand is removable for standard nozzle use

PISTOL GRIP NOZZLES

Full Size Zinc Pistol Grip Nozzle - 573

- Solid brass valve stem with permanent adjusting nut
- Hold-open clip for continuous spraying
- Rust resistant stainless steel spring
- Self-adjusting "duck" packing for lifetime leakproof seal
- Heavy-duty, full-size, die cast zinc body

STRAIGHT NOZZLES

Solid Brass Twist Nozzle (Full Size) - 528

- All brass valve stem
- Four large openings at nozzle tip for full flow
- Replaceable front and rear O-ring seals for leakproof shut-off
- Precise tip angle eliminates side spray
- Adjustable from fine spray to needle stream to heavy rinse
- Fast 3 turns from closed to open
- Heavy-duty solid brass construction

Solid Brass Twist Nozzle (Mid-Size) - 529

- All brass valve stem
- Four large openings at nozzle tip for full flow
- Front and rear O-ring seals for leakproof shut-off
- Precise tip angle eliminates side spray
- Adjustable from fine spray to needle stream to heavy rinse
- Two turns from closed to open
- Heavy-duty solid brass construction

MENDERS & CONNECTORS

Nylon Menders and Couplings

- Premium nylon construction for maximum strength and durability
- Patented impact resistant clamp design
- Non-corroding high-grade stainless steel screws will not strip when tightened
- Manufactured using highest level of quality control
- Reusable, leakproof
- For rubber or plastic hose

01HM/05HM Hose Menders

- 01HM hose mender fits all 5/8" or 3/4"
- 05HM hose mender fits all 7/16", 1/2" or 9/16"

01F/05F Female Couplings

- 01F fits all 5/8" to 3/4"
- 05F fits all 7/16", 1/2" or 9/16"

01M/05M Male Couplings

- 01M fits all 5/8" to 3/4"
- 05M fits all 7/16", 1/2" or 9/16"

Brass Hose Repair Couplers & Menders

- Recommended for rubber hot water hose

NPT: National Pipe Thread NH: National Hose Thread

HOSE END ACCESSORIES

“Y” Polymer Shut-off Connector - 17

- Twin shut-off valves control water flow for two hoses
- Cap type valve handles resist breakage
- Longer legs prevent hose kinks at faucet
- Full ball and retainer rings reduce leakage, even at low pressure
- Durable, rustproof polymer construction
- Not recommended for hot water use

“Y” Zinc Shut-off Connector - 15

- Twin shut-off valves control water flow for two hoses
- Cap type valve handles resist breakage
- Longer legs prevent hose kinks at faucet
- Full ball and retainer rings reduce leakage, even at low pressure
- Rugged zinc die cast construction
- Withstands hot water temperatures to 160-degrees F

Rubber Hose Washers - 01RW

- Heavy-duty rubber construction
- 10 per package

Vinyl Hose Washers - 01CW

- Vinyl construction
- Available on unique tear-off sheets (Model No. 01CW) or in polymer bag with UPC# (Model No. 01CWBAG)

PowerTrack®

HYDRAULIC HOSE & FITTINGS:

R2T Wire Braid Reinforced Hydraulic Hose

SAE Two Wire Braid

- Recommended for: Medium pressure hydraulic oil lines. Meets or exceeds requirements of SAE 1002RAT.
- Tube: Black, oil resistant, synthetic rubber.
- Reinforcement: Two braids of high tensile steel wire.
- Cover: Black, oil and abrasion resistant, synthetic rubber.
- Temperature Rating: -40°F to 212°F constant/250°F intermittent.

OSHA Approved
No skiving required

Hose/Accessories

Reelcraft

Reelcraft

Series 4000 O (Open)

Spring Driven Hose Reels

The ideal reel for all general air or water applications. The series 4000 reel incorporates contemporary engineering and manufacturing techniques to give trouble free performance. Reels are all steel construction and compact for applications with critical space requirements. All Reelcraft reels have a full flow shaft and swivel to assure maximum product delivery. The standard low pressure hose is for air or water service only. The basic reel without hose can be used for air, water or oil. Consult factory for other products and hoses.

MODELS W/HOSE			HOSE CAPACITY			MODELS W/O HOSE		
Low Pressure Air/Water Reels Max. Temp. 150° F - Reel inlet is 3/8" NPTF (F)

4625 OLP	22	300	3/8	.640	25	4600 OLP	18	500

Low pressure hose reels furnished standard with PVC hose.

Series 5000 O (Open)/5000 E (Enclosed)

Spring Driven Hose Reels

The 5000 Series reel incorporates contemporary engineering and manufacturing techniques to give trouble free performance. Reels are all steel construction and compact for applications with critical space requirements. All Reelcraft reels have a full flow shaft and swivel to assure maximum product delivery. The standard low pressure hose is for air or water service only. The basic reel without hose can be used for air, water or oil. Consult factory for other products and hoses.

Series 5000 E reels are the same as 5000 O reels except **E Series reels are fully enclosed**. To order, change the model number suffix letter O to E, Example, 5430 OHP becomes 5430 EHP Add 8 lbs. to open reel weight.

MODELS W/HOSE			HOSE CAPACITY			MODELS W/O HOSE		
Low Pressure Air/Water Reels Max. Temp. 150° F - Reel inlet is 3/8" NPTF (F)

Series 8000 O (Open)

Spring Driven Hose Reels

The 8000 O Series reel is the most compact 3/4" x 50' hose reel available. The reel holds up to 50' of 3/4" I.D. hose or will accommodate up to 100' of 1/2" I.D. hose.

The 8000 O Series Features:

- Sealed ball bearing 3/4" swivel union requires minimum torque and assures smooth hose retraction and full flow.
- Dual ball bearing spool support bearings.
- Designed and tooled for automated manufacturing.
- Three-in-one heat treated aluminum casting incorporates main shaft, ratchet, spring arbor and outlet plumbing in one piece casting.
- Containerized drive spring.
- Hose anti-latch out feature. Eliminates hose lock out.
- Durable baked on powder coat finish. Each component is painted individually.
- Dual Pedestal base and guide arm design, structurally reinforced.
- Guide arm is field adjustable for wall, ceiling, or truck mounting positions.

Series 4000 & 5000

Electric Cord Reels (Open)

(For indoor non-weather tight applications only)

Electric Cord Reel Features:

- Spring Retractable with latch.
- Compact for critical space requirements.
- Engineered for industrial use.
- Durable abrasion and corrosion resistant baked on powder coat finish.
- Wall, ceiling or bench mount.
- All models supplied with cord are complete with 4-5 (approx.) foot pigtail & three prong plug.
- Adjustable cord stop.

Incandescent Hand Lamps:

- Style #1 - Head has single receptacle tool tap, push thru switch and metal grounded guard.
- Style #5 - Rubber handle with vinyl coated cage, without switch or receptacle for non-sparking applications. Automatic on/off switch at reel guide arm. Complies with NEC #511-3.f., Portable lighting equipment. Meets OSHA requirements.

Fluorescent Light Features:

- Energy efficient, uses less electricity than an incandescent light for the same amount of lumens.
- Remains cool, safer when handling.
- Style #2 - Durable shock absorbing lamp holder and shatter resistant tube with switch.
- Style #6 - Explosion Proof 13 watt fluorescent hand lamp with automatic on/off switch at reel guide arm. Hand lamp suitable for Class 1, group C & D locations. Reel is not explosion proof.

- continues -

Hose/Accessories

Reelcraft

Series 4000 & 5000 (continued)

Outlet Receptacles:

- Style #3 - single 15 AMP receptacle with clamp type strain relief.
- Style #4 - Male rubber plug used with recreational vehicles (RV's).
- Style #7 - Metal outlet Box with dual 20 AMP receptacles and GFCI protection with flip-top lid. (see description)

Style #7 - GFCI:

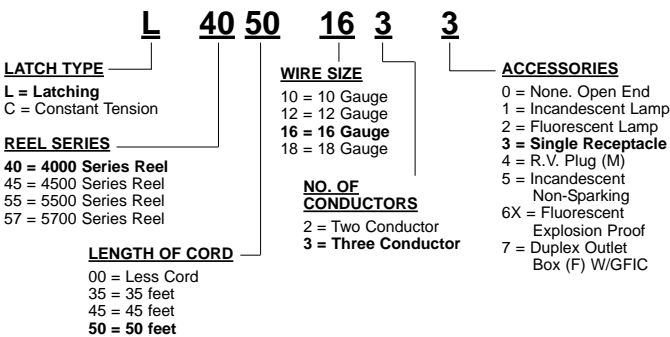

The GFCI Receptacle is designed to protect people from the line-to-ground shock hazards which could occur from defective power tools or appliances operating from this device or from downline outlets protected by it.

Note:The Ground Fault Circuit interrupter does not protect against short circuits or overloads. This is the function of the fuse or circuit breaker.

! Caution: Persons with heart problems or other conditions which make them susceptible to electric shock may still be injured by ground faults on circuits protected by the GFCI Receptacle. There is no safety device yet designed that will protect against all hazards or carelessly handled electrical equipment.
